PERSONAL PROJECTS

Chattify (08/2024)

- Features:** Engineered seamless login functionality with email/password credentials for over 2,500 users; **integrated friend addition and messaging capabilities** that fostered **real-time communication** among **peers** within the app.
- Build:** using **React**, **Typescript**, **Firebase Storage**, Firestore Database, Firebase Authentication, **TailwindCSS**, **SCSS**, **CSS**, **HTML5**.

EzzyShop (11/2024)

- Feature:** designed interactive elements facilitating direct purchases through streamlined cart management processes; achieved over 200 successful test transactions utilizing dummy payments within two weeks of implementation. You also see the **details of products by clicking on the image**.
- Build:** **Next.js**, **TypeScript**, **TailwindCSS**, **CSS3**, **Firebase**, **GSAP**, etc.

MorphoMind (06/2025 - Present)

- Features:** A multi-modal AI web application that allows users to generate text, images, and videos from prompts using advanced generative models, providing a seamless creative experience.
- Build:** **Next.js**, **Tailwind CSS**, and integrated with **AI APIs** like **Gemini** and **Hugging Face** (for text-to-video) and custom backend services.

PixelMind (12/2025 - Present)

- Feature:** Therefore, you may use this website to remove the background of any image you want from your device, or you can use a URL to remove the background and save the deleted background image.
- Build:** **Next.js**, **TailwindCSS**, **Remove.Bg API**, **Framer Motion**
